LIFE22-GIE-BG-LIFE HA2WASTE

Holistic approach to waste management in the transition to circular economy

Project

## „Holistic approach to waste management in the transition to circular economy“

**LIFE22-GIE-BG-LIFE HA2WASTE**

The project is co-funded by **Programme LIFE**  
of the European Union

The project „**Holistic approach to waste management in the transition to circular economy**“ is implemented with the financial support of Programme LIFE of the European Union under Grant Agreement №101113721 — LIFE22-GIE-BG-LIFE HA2WASTE.

The project budget is 1 549 367.49 euro. The financial contribution of Programme LIFE is 929 620.49 euro.

The project duration is 01.7.2023 – 30.06.2026.

The project aims at implementing an innovative for Bulgaria holistic and circular approach to household waste management in municipality Pomorie.

The specific project objectives are:

-  Increase the municipal capacity to develop, implement and manage a new integrated waste management system
-  Ensure software, technical and institutional infrastructure for collection of mixed and separately collected household waste
-  Implement new door-to-door waste collection and Pay-As-You-Throw schemes
-  Increase the knowledge and engagement of residents of municipality Pomorie to practice sustainable consumption, prevention and separate collection of waste
-  Catalyse large-scale replication of the good European practice introduced under the project in other Bulgarian municipalities
